## BEAUTY MASKS INTENSIVE CARE MASKS

Masks are the magic trick of cosmetics. Among other things, they revitalize, moisturize, cleanse, soothe, and regenerate the skin. The beauty secret of a mask lies partly in the heat that is created on the skin. This allows more blood to flow through the capillary vessels of the upper skin layer, providing the tissue with increased nutrients and oxygen and accelerating the removal of waste products. At the same time, the pores open and allow the active substances to be more readily absorbed by the skin. Masks pamper the skin by providing intensive nourishing treatment, and they support and intensify your normal Skin Care System.

Thanks to their highly concentrated natural active ingredients, ANNEMARIE BÖRLIND's vegan intensive treatment masks ensure intensive care and comfort.

The intensive treatment masks, which are formulated for the respective skin types and skin needs, offer a relaxing pampering ritual with visible results and long-lasting effects.

The tolerability and efficacy of all of the masks have been scientifically confirmed.

As a calming Extra-Care Product and an ideal complement to the daily Skin Care System, the BEAUTY MASKS should be used once or twice a week. The masks should be applied to cleansed skin, avoiding the eye area. The VITAMIN DUO mask should be left on for 10-15 minutes and the HYDRO GEL MASK for 5-10 minutes and then rinsed off with warm water. The 2 IN 1 BLACK MASK is gently massaged over the skin with warm water in circular motions to obtain an exfoliating effect and then rinsed off. After gently massaging the SENSITIVE CREAM or ANTI-AGING CREAM MASK in, it will be fully absorbed by the skin.

### HYDRO GEL MASK

Botanical hyaluronic acid effectively balances the moisture content of the skin and smoothes out wrinkles and dryness lines. Red alga helps maintain the hydro-lipid balance. For a radiant, youthful, and fresh complexion.

*38% increase in skin moisture just two hours after application and also a 24-hour moisturizing effect.\**

*87% of the subjects confirm a gentle cooling effect.\**
