

Statement in response to the topic “Vitamin Duo Mask Dispenser”

(Calw, July 2016) The VITAMIN DUO MASK from ANNEMARIE BÖRLIND – Natural Beauty uses a dual airless dispensing system. This dispenser has two chambers that make it possible to separate the orange vitamin-rich phase from the white care phase. The product is most effective when the two phases are combined at the time of application.

To evenly dispense the product, it is necessary that you press the dispenser head in the middle. This area is marked by a grooved, corrugated surface. If the dispenser head is depressed on the side, this can cause the two chambers to release the product unevenly.
